The finality of the previous Office Action has been withdrawn. Applicant's arguments with respect to claims 1-23 have been considered but are moot in view of the new ground(s) of rejection.

The Status of Claims

Claims 1-23 are pending.

Claims 16-19 and 23 have been rejected.

Claims 1-15 and 20-22 are allowable.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

In claim 23, the claimed invention lacks patentable utility due to the product of nature. The claim recites the only phrase "the microorganism *Actinomycetales* sp. DSM 14865"; the examiner recommends to replace the term "the microorganism" with the phrase "A biologically pure culture of" before the phrase "*Actinomycetales* sp. DSM 14865".

Claim Rejections - 35 USC § 112

Claims 16-19, and 23 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled

in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The invention appears to employ a novel strain of *Actinomycetales* sp. DSM 14865 to obtain a specific product. The written description of that strain and the method of isolating is insufficiently reproducible. Therefore, a deposit for patent purposes is required. The specification discloses at page 11-12 that *Actinomycetales* sp. was deposited at Mascheroder Weg 1 B, 38124 Brunswick, Germany under Budapest Treaty conditions on 18.03.2002.

For compliance with the rule, it must be averred that deposited material has been accepted for deposit under the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the purpose of Patent Procedure (e.g. see 961 OG 21, 1977) **and that all restrictions on the availability to the public of the material so deposited will be irrevocably removed upon the granting of a patent. MPEP 2403.**

Additionally, the deposit must be referred to in the body of the specification and be identified by deposit (accession) number, date of deposit, name and address of the depository and the complete taxonomic description.

In claims 16 and 18, the phrase " one of its variants and/or mutants " is recited.

The specification lines 11-13 on page 12 has given only conclusive description of the product of variants and/or mutants ,but no description or enablement how the micro-organism is transformed. Furthermore, with respect to applicants' own deposit of one of its variants and/or mutants of the microorganism, there is absolutely no evidence that applicants have deposited one of its variants and/or mutants of the DSM 14865 species in accordance with the terms of the Budapest Treaty.

Therefore, an appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 16 and 18, the phrase " one of its variants and/or mutants " is recited. this is vague and indefinite because the specification lines 11-13 on page 12 has given only conclusive description of the product of variants and/or mutants. Therefore, an appropriate correction is required.
